

Easy Start 2

What makes our Easy Start 2 special?

Based on the highest quality AGM lead-acid batteries

High cranking power

Patented 12/24 Volt switch technology doubles cranking power on 12Volt starts

Solid State LED Voltage Indicator

Heavy-duty powder coated steel casing

4 Amp Microprocessor Controlled Multi-Stage Charger

Internal Surge and Spike Suppression

Fuse protection of charging circuits and high-power circuits

Twin-flex non-tangle power cables with Anderson connector

Short circuit protected with unique "fuse-in-clamp"

Use of high-quality components throughout

Professional equipment, "Made in the EU"

Technical Specifications

Output power	12 / 24Volt
Cold Cranking Current	700Amp @ 12V / 350Amp @ 24V
Unit weight	18Kg

Package content

Jumpstart unit including cables
